

HIGH SECURITY DOOR

Security
unlimited.

Strength
redefined.

The 90mm High Security Door shown in the photograph is a special slab hinge door with compression mechanism, extra combination lock and optional electronic sensors.

Bankers and Businessmen today are facing the ever increasing problem of security. A problem which Godrej has efficiently tackled, with their experience of over 100 years in the security field.

Today criminal attacks on premises are becoming more and more organised and sophisticated and the use of the most advanced state-of-the-art technology is rampant.

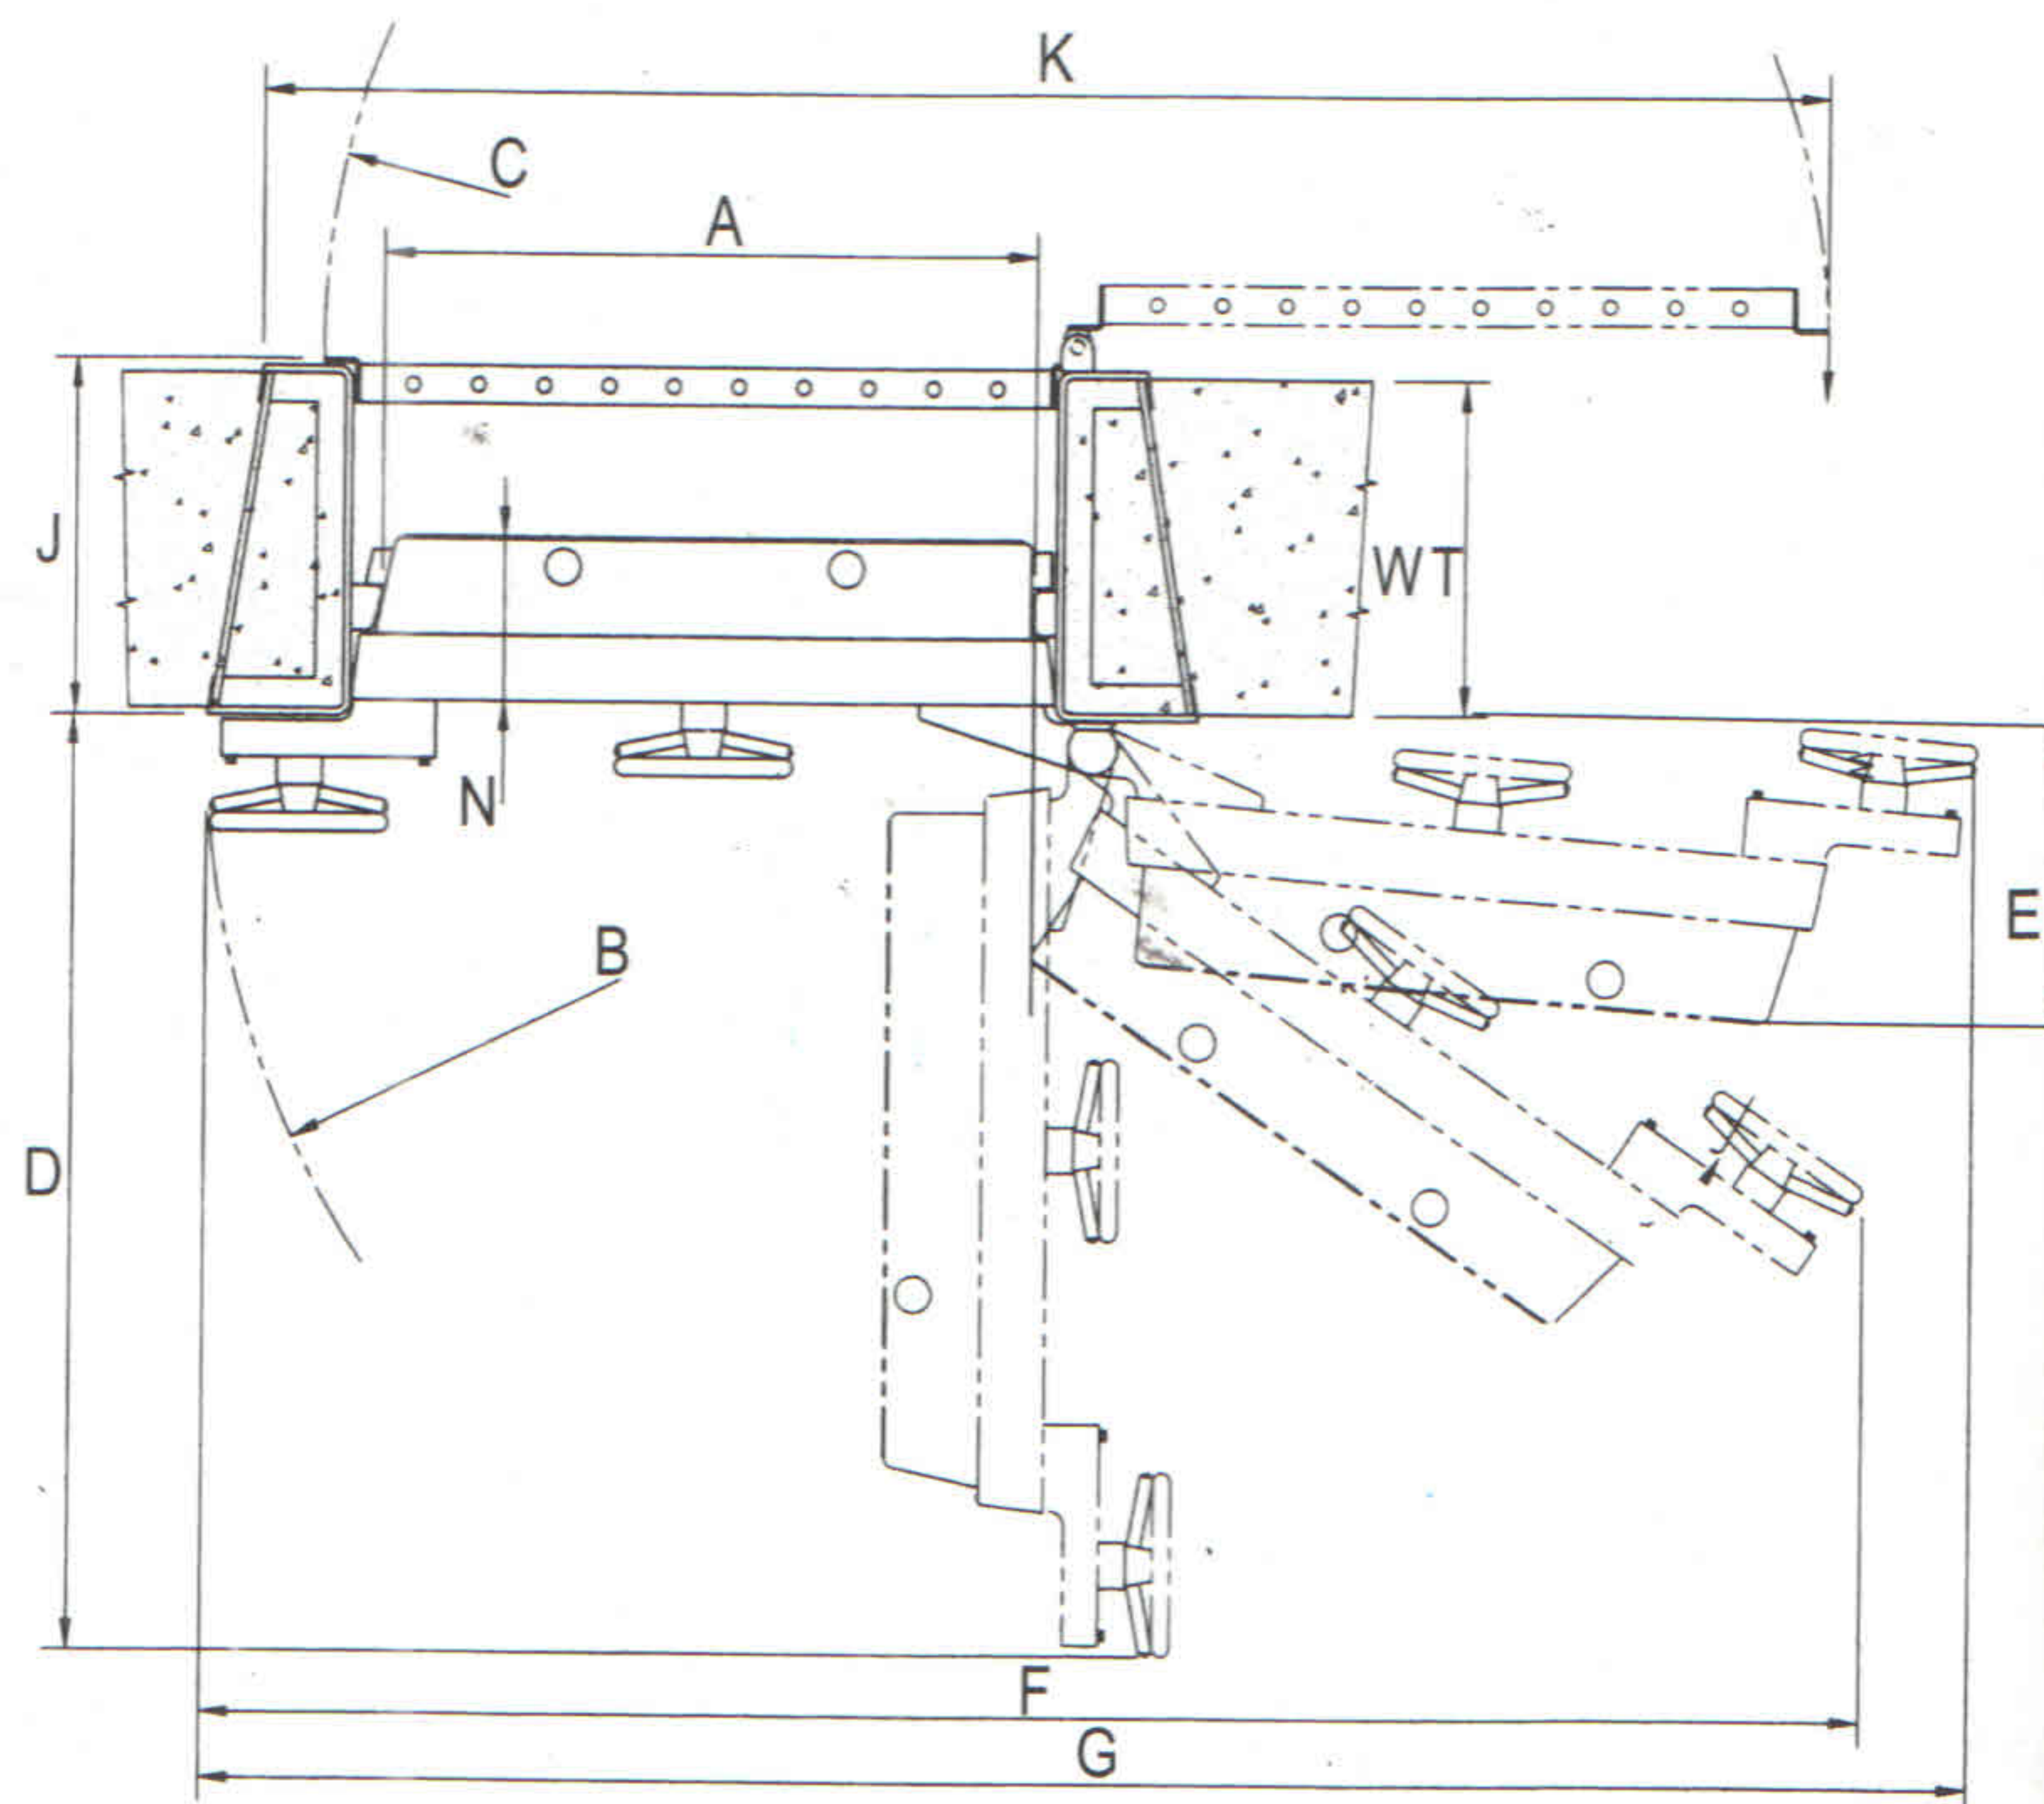

Godrej's remarkable understanding to combat such criminal activities helps it to build highly impregnable barriers for maximum protection. In our continuous endeavour to offer you world-class products using cutting-edge technology, we now offer you another product, in the bank's armoury - A TDR matrix High Security Door.

The Godrej TDR matrix High Security Doors are specially designed to meet the security needs of Banks, Jewellers, Private Vaults and all other Institutions handling cash.

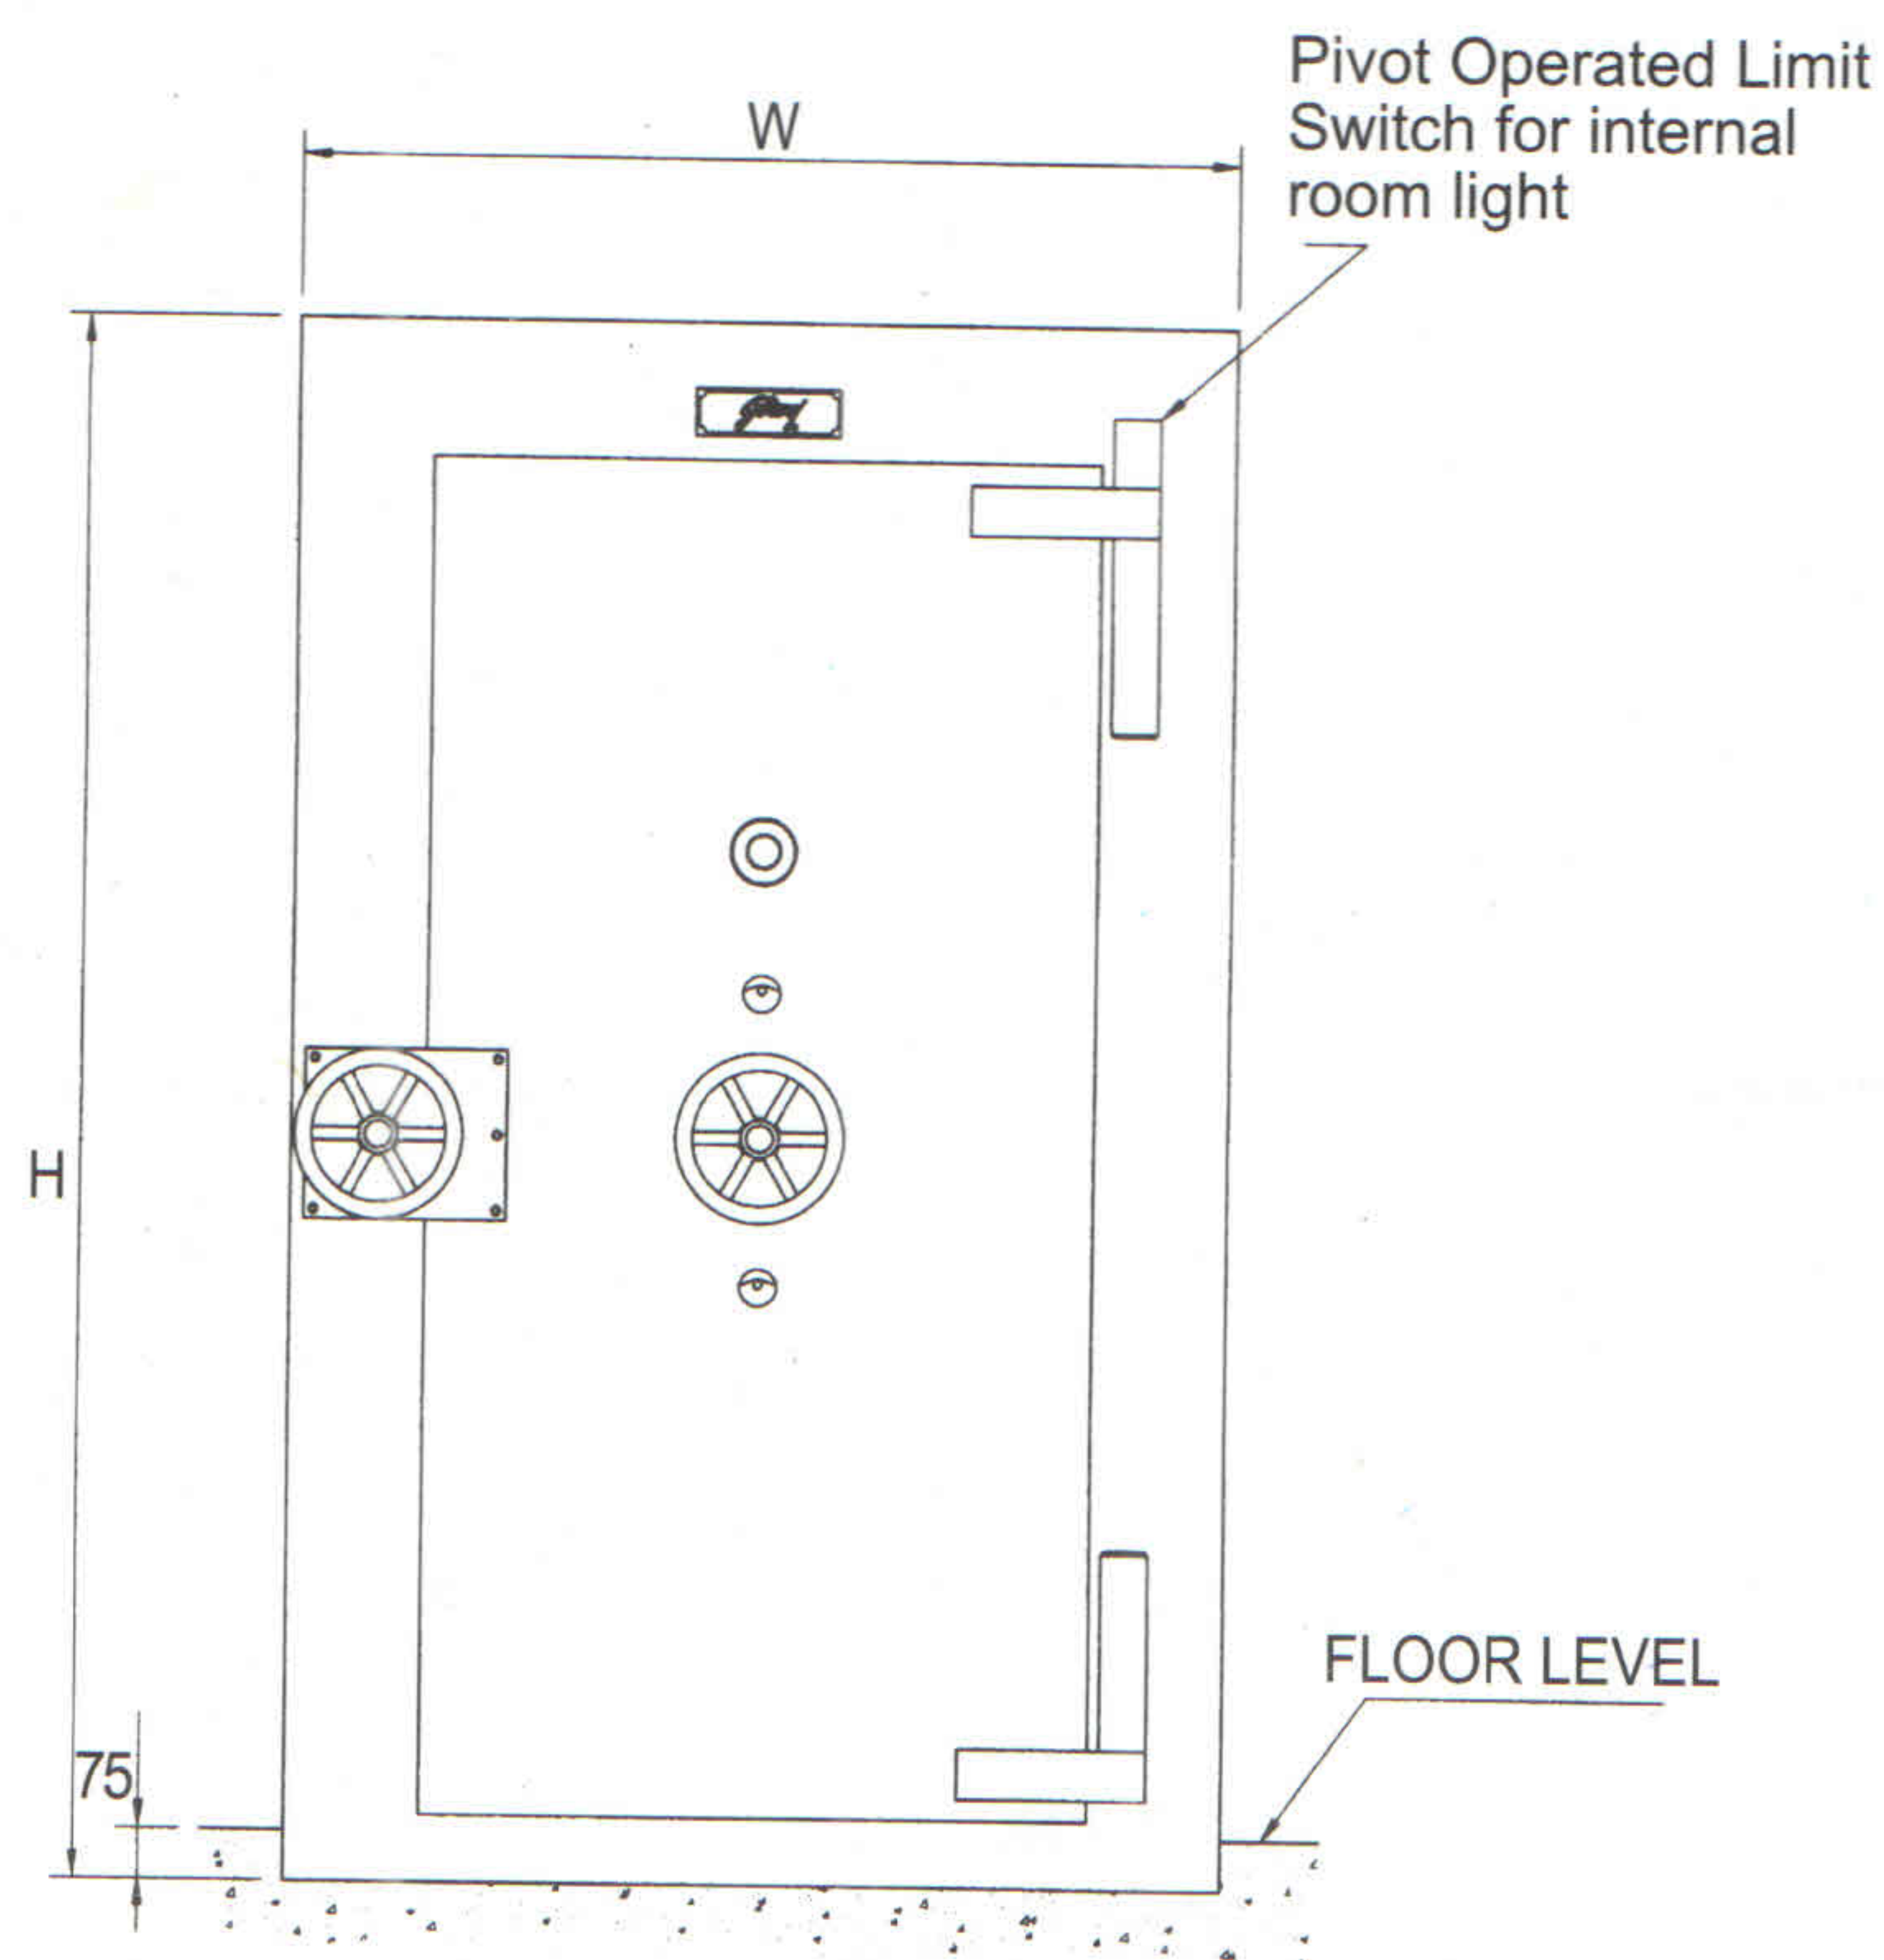

All our Strong Room doors generally comply to the IS 11188. They are made from tested premium quality steel, procured directly from steel manufacturers.

All ferrous components undergo seven step pre-treatment process through the state-of-the-art fully Computerised Surface Treatment Plant followed by an application of anti-corrosion primer coat. This is subsequently finished by overlaying layers of Nitro-Cellulose paint giving it a superior gloss and lasting finish. This unique pre-treatment process ensures rust-free and long life to all Godrej products.
